PROJECT:-

When nations started coming into existence, they each framed a Constitution of their own, keeping in mind their cultural, religious and historical backgrounds.

Today, whatever nation we come from, it's a global world we find ourselves belonging to, aptly calling ourselves world citizens. If something happens in one part of the world today, the rest of the world is bound to come in its sway sooner than later. And, seldom has the world benefited from any of these happenings. Rather, the severity of their adverse effects is so immense, it appears to swipe away the very race of humans from the face of the earth one day.

Nations carry out Constitutional Amendments in order to remain relevant to the changing times and/or forced situations.

The world too has a Parliament of its own – the UNO. It appears that it has, of late, lost its relevance. As a world citizen, write a letter to the Secretary General of the UNO, mentioning the recommendations towards amending the World Constitution to prevent inhumane activities carried out by nations in some or the other pretext.
